

Title: A Fundamental Approach to Cyber Risk Analysis - A Practitioner's Perspective

Presenter: Ben Goodman, 4A Security & Compliance

Abstract:

Following Stefan Laube's presentation "A Fundamental Approach to Cyber Risk Insurance", Ben will share relevant elements from cases he has worked on as a cyber security practitioner. Ben is the founder and CEO of 4A Security & Compliance, a firm that conducts cyber security assessments, breach response and helps organizations mount cyber security defenses. His unique perspective is also informed by his background in insurance and risk management as well as three decades working in IT. Ben's presentation will dovetail with Stefan's, painting a rich picture of real-world cyber risk analysis that ranges from the board room, through the enterprise down into the dark web and back out to the world of cyber insurance.
